How it works

Recommend QuickSync to sellers who run more than one shop, and earn 30% of what they pay every month for their first year.

1

Sign up

Join on our [sign-up page](#). It takes two minutes, and your link is ready straight away.

2

Share your link

Use it wherever sellers ask how to keep stock in sync: client emails, newsletters, videos and forums.

3

Get paid monthly

We pay you each month, after a seller's payment clears and the 30-day refund window passes.

Your link

`quicksync.pro/?via=yourname`

- Add ?via=yourname to any QuickSync page to send people somewhere specific, like `quicksync.pro/shopify-etsy-integration/?via=yourname` for a Shopify and Etsy seller.
- Anyone who clicks your link stays linked to you for 90 days, so it still counts if they start the trial today and subscribe next month.

What you earn

Lite, 2 shops

Seller pays \$19 a month

\$5.70

a month to you

\$68.40 to you over their first year

Pro, 2 shops

Seller pays \$29 a month

\$8.70

a month to you

\$104.40 to you over their first year

Pro, 4 shops

Seller pays \$87 a month

\$26.10

a month to you

\$313.20 to you over their first year

Lite, 8 shops

Seller pays \$133 a month

\$39.90

a month to you

\$478.80 to you over their first year

If a seller adds shops later, their bill goes up and so does your commission.

Good to know

- No minimum, no exclusivity and no contract.
- Always link to quicksync.pro. Sellers who install from the Shopify App Store pay through Shopify, so we can't credit them to you.
- These don't earn commission: your own account, existing QuickSync customers, people already on a trial, and clicks from search ads on the QuickSync name.

Prices and terms here follow quicksync.pro/pricing and quicksync.pro/affiliates as of October 2026. If they ever differ, those pages are right.

About QuickSync

Short, accurate ways to describe QuickSync, and the facts behind them.

One line QuickSync in a sentence

QuickSync keeps stock, listings and orders in sync across up to 8 shops.

Short About 40 words

QuickSync connects Shopify, Etsy, eBay, Amazon, TikTok Shop, WooCommerce, Square, Clover and more. When something sells in one shop, it updates the stock in the others, and orders from every shop arrive in one place. 14-day free trial, no card needed.

Long About 90 words

QuickSync keeps inventory in sync for sellers with more than one shop. It connects 13 platforms, including Shopify, WooCommerce, Etsy, eBay, Amazon, TikTok Shop, Square, Clover and Lightspeed, plus QuickBooks and Xero for accounting. When something sells in one place, QuickSync updates the stock everywhere else. Orders from every shop arrive in one list, and a listing created once can be shared with your other shops. Pricing is based on catalogue size and number of shops, never on orders. More than 27,000 sellers use it.

Up to 1,000 items

Stock sync

Most chosen

Pro

\$29 a month

Up to 2,500 items

Stock, product and order sync

Ultra

\$69 a month

Up to 10,000 items

Everything in Pro, plus price rules per shop and setup done for you

Ultra+

\$99 a month

Up to 20,000 items

Everything in Ultra, plus priority syncing

Prices are per month for two shops. Each extra shop adds the plan price again, up to 8 shops. Yearly billing saves 10%.

Who to recommend it to

Agencies

You build Shopify or WooCommerce stores for clients who also sell on Etsy, eBay or Amazon.

Ecommerce consultants

You recommend the tools a seller's business runs on.

Bookkeepers

Your clients sell in several places and keep their books in QuickBooks.

Creators and community members

Your audience keeps asking how to keep stock in sync.

Emails and newsletters

Replace yourname with the name in your own link before you send.

Email

For agencies: a client email after launch

SUBJECT Keeping your stock in sync

Hi {first name},

Now that your Shopify store is live next to your Etsy shop, the thing to watch is stock: when something sells on one, the other needs to know.

We recommend QuickSync for this. It keeps one stock count across both shops, and Etsy orders can come straight into Shopify, so you pack everything from one place.

It's \$19 a month for two shops, or \$29 if you'd like listings and orders synced too. There's a 14-day free trial, no card needed:

<https://quicksync.pro/shopify-etsy-integration/?via=yourname>

Happy to set it up with you on our next call.

{your name}

PS: we earn a commission if you subscribe through this link. Your price stays the same.

Email

For bookkeepers: getting shop sales into QuickBooks

SUBJECT Your shop sales, straight into QuickBooks

Hi {first name},

Right now we enter your shop sales into QuickBooks by hand. There's a tool that can do it for us.

QuickSync sends each order from your shops into QuickBooks Online automatically, with tax, tips and shipping on their own lines. Paid orders arrive as sales receipts, so there's nothing to retype.

It's part of QuickSync's Pro plan, from \$29 a month, with a 14-day free trial and no card needed:

<https://quicksync.pro/integrations/quickbooks-integration/?via=yourname>

I'm happy to connect it with you and check the first week together.

{your name}

PS: I earn a commission if you subscribe through this link, at no extra cost to you.

Email

For consultants: a short recommendation

To keep stock in sync across your shops, I recommend QuickSync. It connects Shopify, Etsy, Amazon and the other places you sell, updates stock everywhere when something sells, and on the Pro plan brings every order into one list. Plans start at \$19 a month for two shops, with a 14-day free trial: <https://quicksync.pro/?via=yourname>

(I earn a commission if you subscribe, at no cost to you.)

Newsletter

A short mention

Selling in more than one place? QuickSync keeps your stock in sync across Shopify, Etsy, eBay, Amazon and more, so a sale in one shop updates the rest. 14-day free trial, no card: <https://quicksync.pro/?via=yourname> (affiliate link)

Newsletter

A longer section

Sell the last one twice, and the buyer finds out before you do.

That's the risk of selling the same stock in several places. QuickSync connects Shopify, Etsy, eBay, Amazon, TikTok Shop, WooCommerce, Square, Clover and more, and updates stock everywhere when something sells. On Pro, orders from every shop arrive in one list.

It's priced by catalogue size and number of shops, never by orders, from \$19 a month for two shops. Try it free for 14 days, no card needed: <https://quicksync.pro/?via=yourname>

I earn a commission if you subscribe through this link.

Social posts

Pair each post with an image from this kit, and keep the affiliate note next to your link. Like our own posts, these use just a few emojis: usually one to open and one before the link.

LinkedIn For agencies and consultants

Most multichannel stores don't break at launch. They break a month later, when the last one sells on Etsy and Shopify still shows it in stock.

 For our clients, we fix that with QuickSync:

- One stock count across up to 8 shops, including Shopify, WooCommerce, Etsy, eBay, Amazon, TikTok Shop, Square and Clover
- On Pro, orders from every shop arrive in one list, ready to pack
- Priced by catalogue size and shops, never by orders, from \$19 a month for two shops

👉 14-day free trial, no card: <https://quicksync.pro/?via=yourname>

(Affiliate link: I earn a commission if you subscribe.)

IMAGE quicksync-stock-1200x628.png

LinkedIn

For bookkeepers

If your clients sell on Shopify, Square or Clover, their sales don't need retyping into QuickBooks.

QuickSync sends each order into QuickBooks Online automatically, with tax, tips and shipping on their own lines.

It's on QuickSync's Pro plan, from \$29 a month, with a 14-day free trial:

<https://quicksync.pro/integrations/quickbooks-integration/?via=yourname>

(Affiliate link: I earn a commission if you subscribe.)

IMAGE quicksync-quickbooks-1200x628.png

X or Threads

One post

Selling on Shopify and Etsy? QuickSync keeps one stock count across both, so when one sells, the other updates. From \$19/mo for two shops.

Facebook

For a group or community

✨ If you sell the same stock on more than one platform, this is what I use: QuickSync.

It keeps one stock count across all your shops:

- Works with Shopify, Etsy, eBay, Amazon, TikTok Shop, WooCommerce, Square and Clover
- A sale in one shop updates the stock in the others

👉 14-day free trial, no card: <https://quicksync.pro/?via=yourname> (my affiliate link)

Check the group's rules on links first.

Forums and video

Answer the question first, follow each forum's rules on links, and say when a link is yours.

Forum

When someone asks how to sync Shopify and Etsy

I had the same problem. I use QuickSync now: it keeps one stock count across Shopify and Etsy, and Etsy orders come into Shopify, so I pack everything from one place. It's \$19 a month for two shops, or \$29 if you want listings and orders synced too. There's a 14-day free trial, no card: <https://quicksync.pro/shopify-etsy-integration/?via=yourname>

Full disclosure: that's my affiliate link.

YouTube

A video description

👉 Try QuickSync, the inventory sync tool in this video: <https://quicksync.pro/?via=yourname>

Affiliate link: I earn a commission if you subscribe, at no extra cost to you.

What it does:

- Keeps one stock count across Shopify, Etsy, eBay, Amazon, TikTok Shop and more
- Updates the stock in your other shops when something sells

From \$19 a month for two shops, with a 14-day free trial. No credit card needed.

💬 Questions about the setup? Ask in the comments.

Making a demo video

1. Connect two shops, for example Shopify and Etsy.
2. Show products matching by SKU.
3. Turn on stock sync, make a test sale on Shopify, and show the stock drop on Etsy.
4. On the Pro plan, turn on order sync and show an Etsy order arriving in Shopify.
5. Finish on price: from \$19 a month for two shops, and orders never cost extra.

The screenshots in the Images section show each step if you'd rather not record your own.

Questions sellers ask

Short answers you can pass on.

Which platforms does it work with?

Shopify, WooCommerce, Etsy, eBay, Amazon, TikTok Shop, Square, Clover, Lightspeed, Squarespace and Wix, plus QuickBooks and Xero for accounting. See them all at quicksync.pro/integrations.

How much does it cost?

From \$19 a month for two shops. Each plan covers two shops, and every extra shop adds the plan price again. Orders are unlimited on every plan, and yearly billing saves 10%.

Is there a free trial?

Yes, 14 days, and no card is needed to start.

How many shops can I connect?

Up to 8, on every plan.

Do my products need SKUs?

Yes. QuickSync matches products across shops by SKU. If some products don't have one, QuickSync can create SKUs for them.

Can it copy my products to a new shop?

Yes, on Pro and above. Create a listing once, and QuickSync can add it to your other shops and keep it up to date.

Can I manage all my orders in one place?

Yes, on Pro and above. Orders from every shop arrive in one list, and you can send them to one store, like Shopify, to pack and ship.

What counts as an item?

Each variation a buyer can choose. A t-shirt in 4 sizes and 3 colours is 12 items. The same item sold in 6 shops still counts once.

Dos and don'ts

A few rules that keep your recommendation credible, and your commission counted.

Do

- ✓ Link to quicksync.pro with your own ?via= link.
- ✓ Say it's an affiliate link, close to the link: "Affiliate link: I earn a commission if you subscribe, at no extra cost to you." On social posts, #ad works.
- ✓ Use the images, logos and copy in this kit.
- ✓ Spell it QuickSync: one word, with a capital Q and S.

Don't

- ✗ Link to the Shopify App Store. Those sign-ups can't be credited to you.
- ✗ Run search ads on the QuickSync name. They don't earn commission.
- ✗ Promise what QuickSync doesn't do, like "real-time on every channel", "never oversell again", "unlimited shops" or "free forever".
- ✗ Offer discounts or codes we haven't given you.
- ✗ Use "QuickSync" in your domain, social handle or ad account name, or present yourself as QuickSync.
- ✗ Stretch, recolour or edit the logo, or place it so QuickSync looks endorsed by Shopify, Etsy or another platform.
